

## SUMMARY

- Finalizing a PhD in NLP researching cross-lingual transfer and multilinguality in structured prediction tasks. Four first author papers in ACL, EMNLP, and TACL with expected completion in January 2024.
- Seven years experience in NLP research including cross-lingual transfer, machine translation evaluation, and multimodal generative models. Recent work focuses on multilinguality using latent variables, optimization algorithms for domain adaptation, and parameter compression for large language models.
- Pursuing an industry role for research in expanding NLP to new languages & communities, model efficiency, and theoretical & empirical analysis of optimization.
